# Microblading

is more than a treatment, it's  
an  
**Art**

Microblading is a semi permanent tattoo that has a 3-D embroidery pattern. It mimics that of real hair. You choose how you want them to appear shape and color wise, so there are many options.

The procedure is virtually painless and lasts up to three years, with proper care. Oilier skin types may only last two years. It takes two sessions to complete, with a one month healing time between sessions. Touchups will eventually be needed as time goes on to maintain the look.
